# SCALING DATA ANALYTICS DELIVERY MODEL

DEVOPS BY THE BOOK IN BI

DMITRY LUCHNIK

DIRECTOR SOLUTION ARCHITECTURE – DATA & ANALYTICS

# WHAT IS DATA ANALYTICS AT ADIDAS

# GLOBAL COMPANY

# GLOBAL COMPANY

## DISTRIBUTED ANALYTICS

### NORTH AMERICA

### LATIN AMERICA

### EMEA

### HQ FUNCTIONS

### GREATER CHINA

### ASIA-PACIFIC

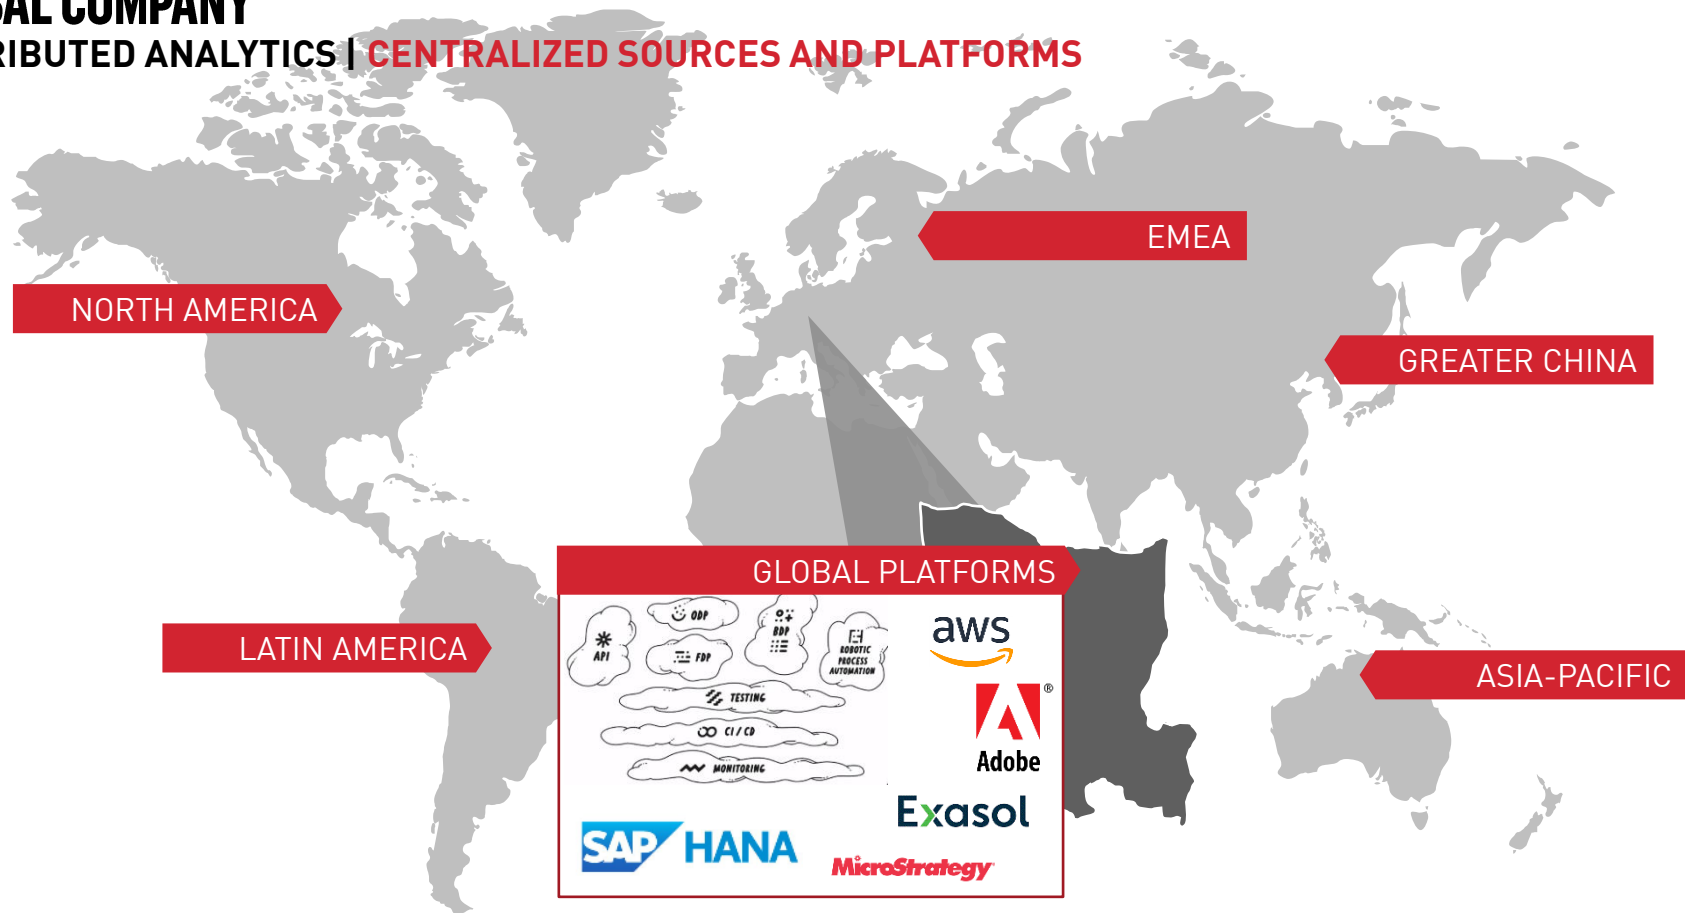

# GLOBAL COMPANY

## DISTRIBUTED ANALYTICS

# GLOBAL COMPANY

## DISTRIBUTED ANALYTICS | CENTRALIZED SOURCES AND PLATFORMS

# DATA ANALYTICS OVERVIEW

## DRIVING THE DIGITAL TRANSFORMATION TOWARDS DATA-DRIVEN DECISION MAKING

### Data consumption tailored for different personas

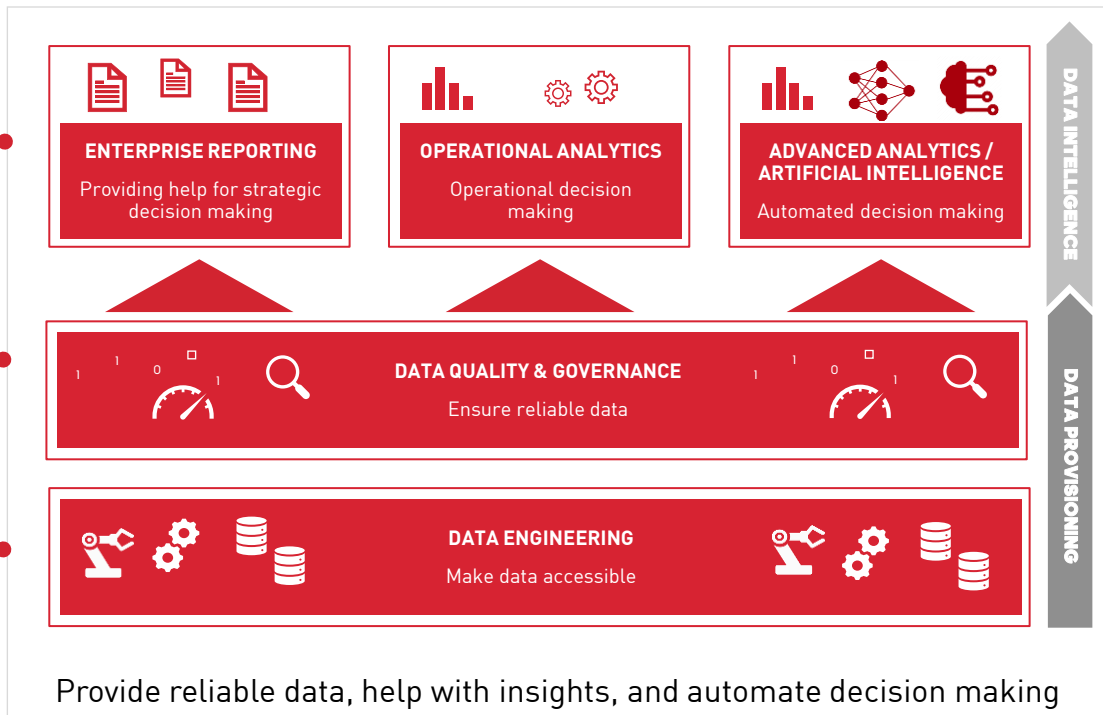

Multiple possibilities to interact with the data: standardized reports and dashboards, flexible data exploration, data labs.

### Reliable data

Ensuring right and reliable data, data catalog, providing transparency on the data quality.

### Connected data experience

Creating a connected data experience by making data accessible in an integrated enterprise-wide data lake. Providing tools and platforms for data exploration.

# **ZOOMING INTO OPERATIONAL ANALYTICS**

# WHAT IS OPERATIONAL ANALYTICS?

EXAMPLE

EXAMPLE

City	Year	Revenue (M\$)	Profit (M\$)	Units Sold (K)	Market Share (%)	Customer Satisfaction (1-5)	Operational Efficiency (1-5)
London	2020	1200	150	120	15%	4.2	4.5
London	2021	1300	160	130	16%	4.3	4.6
London	2022	1400	170	140	17%	4.4	4.7
Paris	2020	900	110	90	12%	4.1	4.4
Paris	2021	950	115	95	13%	4.2	4.5
Paris	2022	1000	120	100	14%	4.3	4.6
New York	2020	1500	180	150	18%	4.3	4.6
New York	2021	1600	190	160	19%	4.4	4.7
New York	2022	1700	200	170	20%	4.5	4.8
Los Angeles	2020	800	100	80	10%	4.0	4.3
Los Angeles	2021	850	105	85	11%	4.1	4.4
Los Angeles	2022	900	110	90	12%	4.2	4.5
Shanghai	2020	1100	140	110	14%	4.1	4.4
Shanghai	2021	1150	145	115	15%	4.2	4.5
Shanghai	2022	1200	150	120	16%	4.3	4.6
Tokyo	2020	1000	130	100	13%	4.0	4.3
Tokyo	2021	1050	135	105	14%	4.1	4.4
Tokyo	2022	1100	140	110	15%	4.2	4.5

EXAMPLE

## TYPICAL OA QUESTIONS

- How to rebalance our stock between European countries?
- When it worth to do it with an air shipping?
- What are current deviations from standard lead times from factories to customers?
- How to balance load in factories?

# OA OPERATES IN “HUB AND SPOKES” MODEL

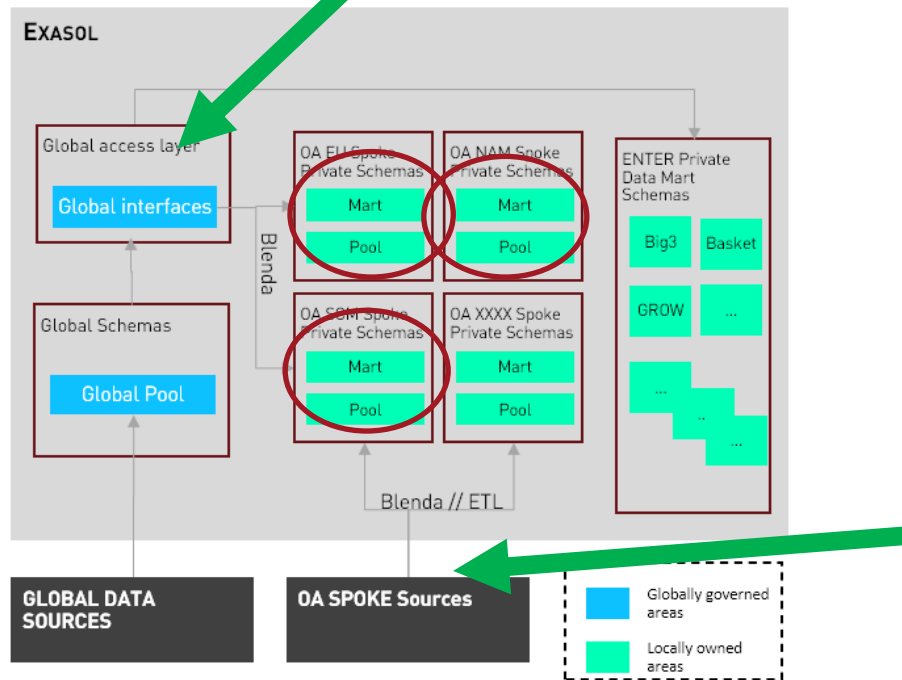

**HUB** – provides platforms, tools, ways of working and Global data

**SPOKES** – are empowered BI teams, located close to the analytics customers.

# MANAGING OA DATA

**Global** data is **centrally** provisioned by the Global **Hub** team

To truly unlock potential of Local Analytics, it's often required to combine **Global** data with the **Local** addons.

Then transform and extract Local **meaning**.

**Spokes** are fully enabled to do it.

# IS THERE A TECHNICAL CHALLENGE?

- Diverse infrastructure
- Multiple teams / many Markets
- Own processes
- Diverse skill levels

# ARCHITECTURE FORMULA

## TO ENABLE SPOKES AND ACCELERATE THEIR DELIVERY

Governance  
Global/Local areas  
Layers  
How people work  
Processes

+

+

Loosely coupling  
Separation of Concerns  
Transparency  
Test Automation  
Tests on every change  
Deploy Automation  
Automatic Reports  
Notifications  
Free Components:

- Bitbucket
- OpenSource
- Jenkins

→

Combining:

- Governance
- Speed
- Quality
- Empowerment

×

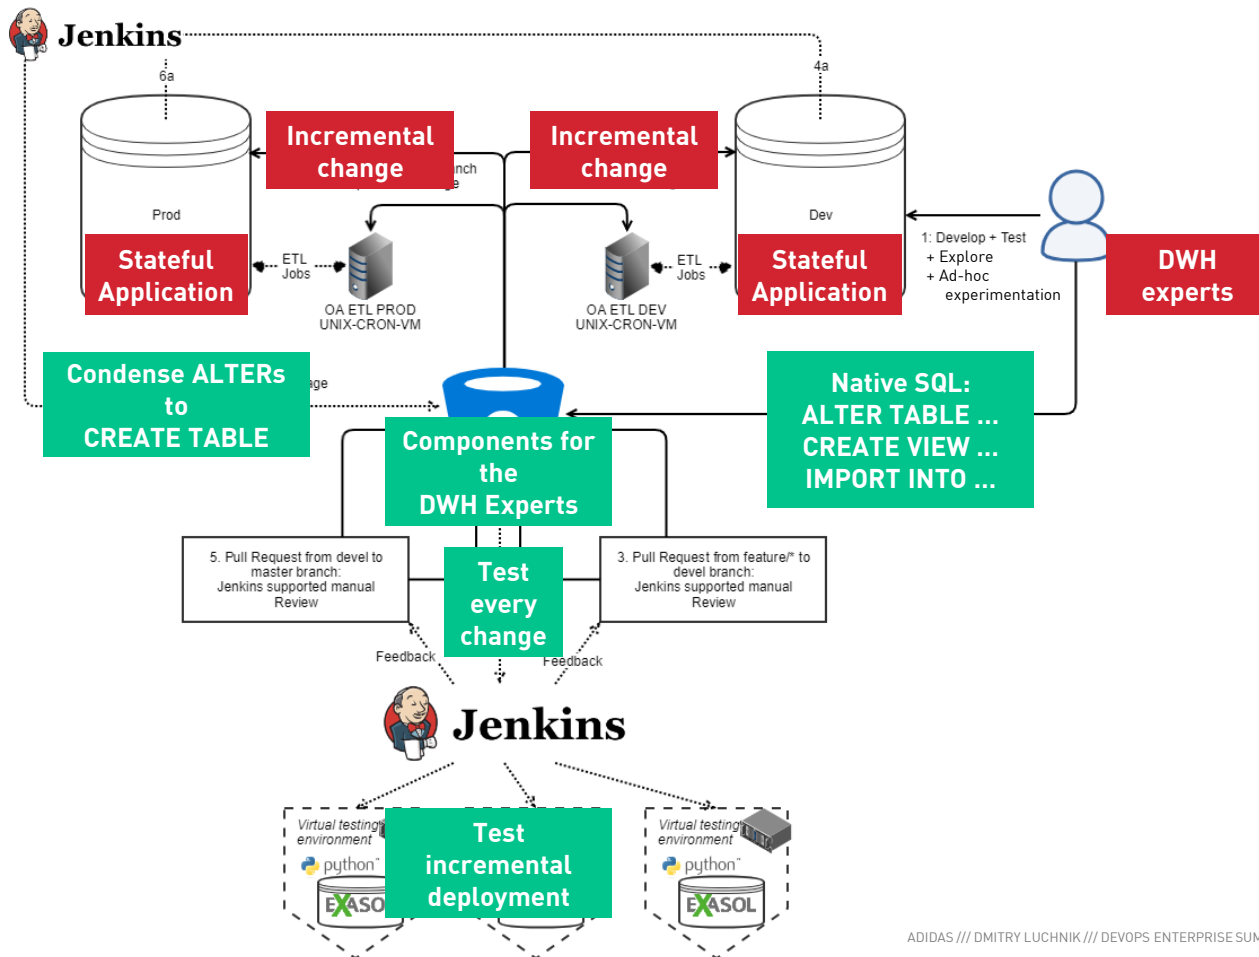

Automation

↓

Acceleration

# DEVELOPMENT AND DEPLOYMENT WITH BLENDA

# WHAT BLENDA TESTS?

Emulate incremental production deployment

```

49      THEN CAST(VALIDTO_DATE AS DECIMAL(18,8))
50      ELSE NULL
51      END AS VAL_TOTD_DATE_TO
52      ,CASE
53      WHEN IS_DATE(ORDER_HEADER_DATE)
54      THEN CAST(ORDER_HEADER_DATE AS
55      DECIMAL(18,8))
56      ELSE NULL
57      END AS ORDER_HEADER_DATE_TO
58      ,CAST(ORDER_QTY_UOM_SALES AS DECIMAL(18,8)) AS
59      ORDER_QTY_UOM_SALES
60
61      FROM GLOBAL_TRANSACTIONAL_DATA_NOM_NCI_APS_US
62      WHERE RECORDNO <= 'R'
63
64      THEN CAST(VALIDTO_DATE AS DECIMAL(18,8))
65      ELSE NULL
66      END AS VAL_TOTD_DATE_TO
67      ,CASE WHEN DOCUMENT_TYPE='ZREL'
68      THEN (CASE WHEN
69      IS_DATE(ORDER_HEADER_DATE)
70      THEN CAST(ORDER_HEADER_DATE AS
71      DECIMAL(18,8))
72      ELSE NULL
73      END)
74      ELSE (CASE WHEN
75      IS_DATE(CREATE_DATE)
76      THEN CAST(CREATE_DATE AS
77      DECIMAL(18,8))
78      ELSE NULL
79      END)
80      END AS ORDER_DATE_TO
81      ,CAST(ORDER_QTY_UOM_SALES AS DECIMAL(18,8)) AS
82      ORDER_QTY_UOM_SALES
83      ,CAST(ORDER_QTY_UOM_SALES AS DECIMAL(18,8)) AS
84      ORDER_QTY_UOM_SALES
85
86      FROM GLOBAL_TRANSACTIONAL_DATA_NOM_NCI_APS_US
87      WHERE RECORDNO <= 'R'
    
```

Impact to a frontend report

Alignment of a local KPI calculation with a global definition

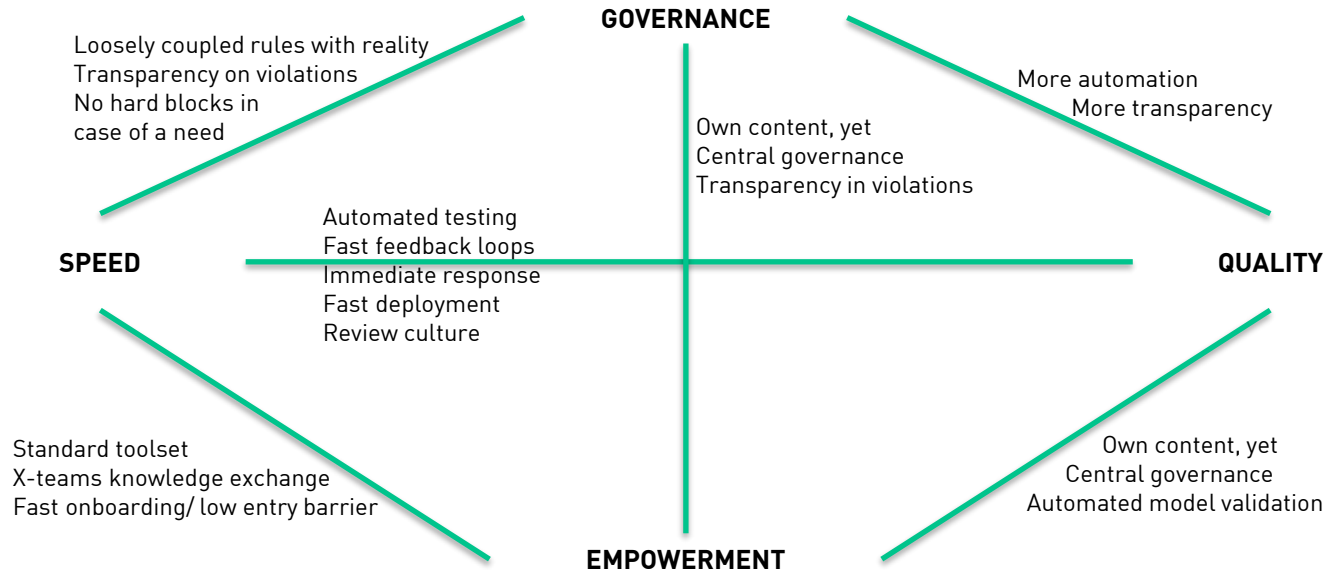

# WHAT USUALLY WORKS TOGETHER?

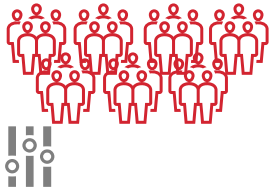

# HOW BLENDA HELPS

# BLEND A INSIDE

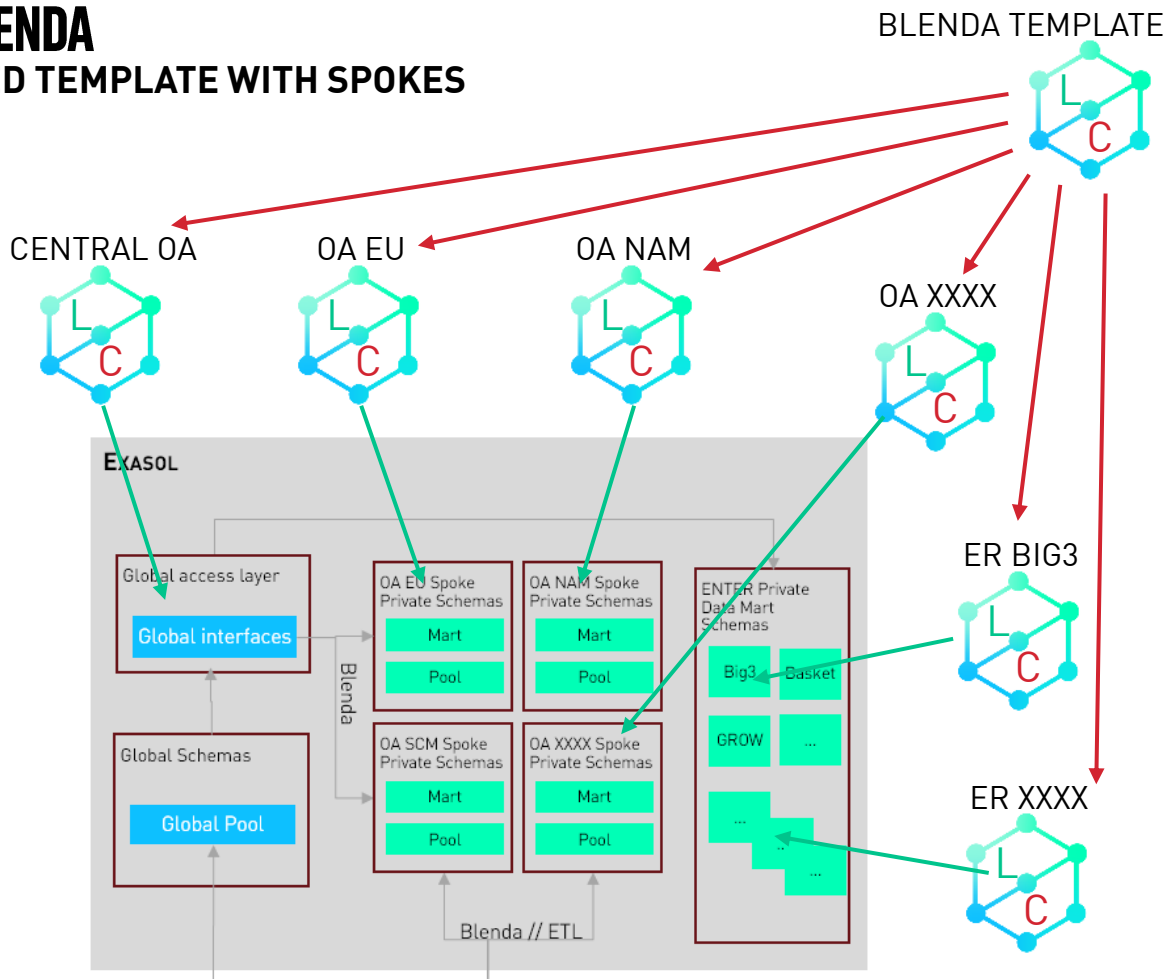

## CLEARLY SEPARATED LAYERS – LOOSELY COUPLED TO ENABLE SPEED

	LAYER	POPULATION & X-DOMAIN COMPLEXITY	UNDERSTANDING OF CONCEPTS AND TOOLS	LEARNING & INTRO CURVES	ONBOARDING
LOCAL OWNERSHIP	1 Spoke/ module content – data models, ETLs, etc.		DWH: ++++++++ ETL: ++++++++ SQL: ++++++ CI: + git: +		From 1 hour
	2 QA framework – testing consistency, etc.		DWH: ++++++++ Testing: ++++ CI: +++ git: +++ python +		4h+
CENTRAL OWNERSHIP	3 Architecture, templates, deployment mechanics, technical tools		Architecture: ++++++++ CI/DevOps: ++++++++ git: ++++++++ python: ++++++++ docker: ++++++		Constant improvements

# CONSUMING BLENDA

## LOOSELY COUPLED TEMPLATE WITH SPOKES

### CENTRAL CONTENT

- 3** Framework, deployment mechanics, technical tools
- 2** Global tests

### LOCAL CONTENT

- 2** Local tests
- 1** Data models, ETLs

# FOLLOWING THE BOOK...

## CAPABILITIES FROM ACCELERATE

- ✓ Continuous Delivery
  - ✓ Version control
  - ✓ Deployment automation
  - ✓ Continuous Integration
  - ⊖ ~~Trunk-based development~~
  - ✓ Test automation
  - ⊖ ~~Test data management~~
- ✓ Continuous Delivery
- ✓ Architecture
  - ✓ Loosely coupled
  - ✓ For empowered teams
- ✓ Process
  - ✓ Work in small batches.
  - ✓ Foster and enable team experimentation
- ✓ Lean management and monitoring capabilities
  - ✓ Have a lightweight change approval processes

## BLENDA ENABLES

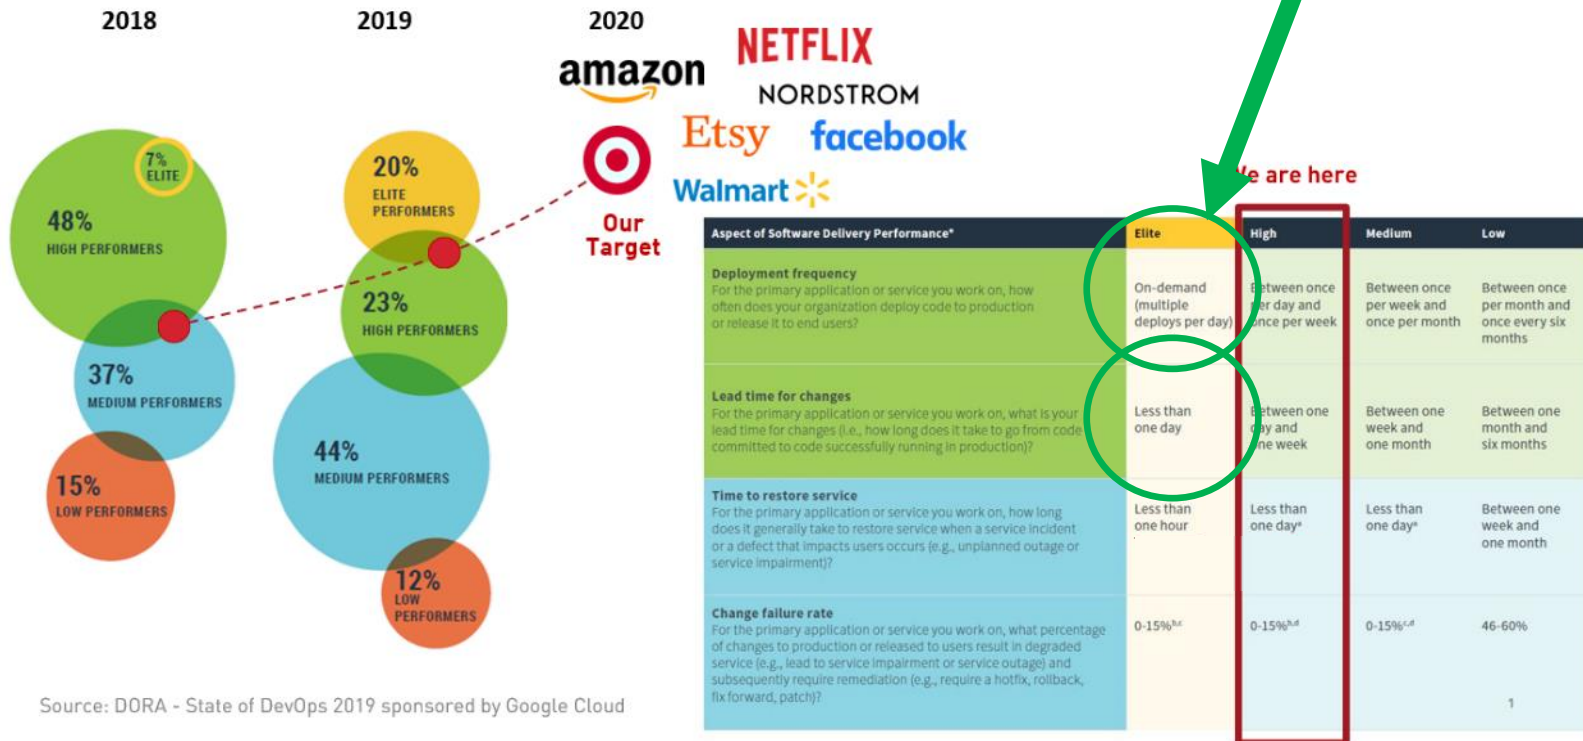

- Every update of a model, KPI or transformation is visible
  - 💬 “Good, we’ve added just this one new calculation”
- Packaging of dependent changes in a single deployable block
  - 💬 “OK! This ETL writes into a new column, and both changes are here.”
- Testing of full data model on every change
  - 💬 “My data model is always consistent.”
- Automated on-demand deployments
  - 💬 “CI looks good, pushing it now.”
- Full internal know-how
  - 💬 “Ah! This is how that was done before!”

# ADIDAS TECH'S TARGET IS TO BE IN THE GROUP OF ELITE PERFORMERS IN SOFTWARE DELIVERY

## DATA WAREHOUSE & ANALYTICS CAN FOLLOW THE SAME PATH

### INDUSTRY BENCHMARK - SOFTWARE DELIVERY PERFORMANCE

IN 2019, THE **% OF ELITE** PERFORMERS IN THE MARKET HAS ALMOST **TRIPLED**, DRIVING FURTHER **INCREASE OF CONSUMER EXPECTATIONS**

# EFFICIENCY VIA BLENDA: DEPLOYMENT FREQUENCY

## DEPLOYMENTS PER DAY

*\* every bar - is a number of deployments per day*

*\* every color – is an independent team*

# EFFICIENCY VIA BLENDA: LEAD TIMES

## SHORT *TO-PROD* CYCLES CREATE FLOW

2021-03-12_130831_prod	Pull request #786: RMA Include HU	12 Mrz 2021 13:08

# RESULTS IN A NUTSHELL

 100.000

80Tb

  
3.000

 20 mins

## LEARNINGS

- **Native SQL** over abstractions like **liquibase** or **sql alchemy**
- Reliable **deployment mechanics** is a key
- **Fast CI** is a must

# THE HELP I'M LOOKING FOR....

- How to speed up and scale processes for bringing new data to the Analytics ecosystem?

# THANK YOU!
